

## Komodo Edit

Last Updated Thursday, 07 February 2008

I have found another very fine IDE for Python and other dynamic scripting languages (including Perl, PHP, Python, Ruby and Tcl; plus support for browser-side code including JavaScript, CSS, HTML and XML). Komodo Edit is based on the Mozilla platform and can be extended like Firefox or Thunderbird with the same xpi-extensions. Komodo Edit is for free and available for Windows, Mac OS X and Linux.

A list of all features can be found here: [Activestate](#). Together with PyScripter Komodo Edit is my favorite Python IDE.
